# Jotun Durasol 4003 (K002), Jotun Powder Coatings U.A.E. Ltd. (L.L.C.) Dubai

Jotun A/S

www.epd-norge.no

# **General information**

#### **Product:**

Jotun Durasol 4003 (K002), Jotun Powder Coatings U.A.E. Ltd. (L.L.C.) Dubai

## Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo

Phone: +47 97722020 e-mail: post@epd-norge.no

#### **Declaration number:**

NEPD-2283-1040-EN

## **ECO Platform reference number:**

# This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. IBU PCR Part B for coatings with organic binders

#### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### **Declared unit:**

1 kg Jotun Durasol 4003 (K002), Jotun Powder Coatings U.A.E. Ltd. (L.L.C.) Dubai

# **Declared unit with option:**

A1,A2,A3

#### **Functional unit:**

# Verification:

Independent verification of data, other environmental information and the declaration according to ISO14025:2010, § 8.1.3 and § 8.1.4

External

Third party verifier:

Sign

and Ronning

Senior Research Scientist, Anne Rønning

(Independent verifier approved by EPD Norway)

#### Owner of the declaration:

Jotun A/S

Contact person: Anne Lill Gade Phone: +47 33 45 70 00 e-mail: anne.lill.gade@jotun.no

#### Manufacturer:

Jotun A/S

#### Place of production:

Jotun Powder Coatings U.A.E. Ltd. (L.L.C.) Al Quoz Industial Area 3,368-11A Al Quoz street, DM-15 Dubai

# Management system:

ISO 9001:2008 Certificate nr: 0044915-00, ISO 14001:2004 Certificate nr 0044914-00, OHSAS 18001:2007 Certificate nr: 0044916-00.

#### Organisation no:

923 248 579

Issue date: 26.06.2020

Valid to: 26.06.2025

# Year of study:

2020

# Comparability:

 $\mbox{EPD}$  of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

### **Author of the Life Cycle Assessment:**

The declaration is developed using eEPD v4.0 from LCA.no

Approval:

Company specific data are:

Collected/registered by: Cleo Alves Otterbech

Internal verification by: Anne Lill Gade

# Approved:

Sign

Håkon Hauan Managing Director of EPD-Norway

# **Product**

#### **Product description:**

Jotun Durasol 4003 is a lead-free powder coating which is designed to withstand the most stringent weather conditions and meet industry requirements for high performance and long lasting attractive finishes. This TGIC-free product combines outstanding gloss retention and colour stability properties and ensures highest corrosion resistance levels.

#### Application areas

The declared product is highly recommended for architectural aluminium extrusions and claddings where climatic conditions put severe strain on exterior surface and where advanced corrosion protection, gloss and color retention are essential.

#### **Product specification**

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared mixed product is given below:

Materials	%
Binder	50 - 75 %
Titanium dioxide	25 - 50 %
Additive	1 - 3 %
Pigment	1 - 3 %
Filler	0.3 - 1 %
Solvent	0.3 - 1 %

#### Technical data:

Density: 1.2 - 1.5 g/cm³ Film thickness: 50-70 µm

The most representative and worst case formulation produced at the manufacturing site is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide.

The product packaging is based on an average sized carbon box with plastic liner.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

### Market:

Global. Transport to market is not included in this EPD.

## Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

# Estimated service life, object

The coated object is not declared.

# LCA: Calculation rules

#### Declared unit:

1 kg Jotun Durasol 4003 (K002), Jotun Powder Coatings U.A.E. Ltd. (L.L.C.) Dubai

#### **Cut-off criteria:**

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than  $0.1\,\%$  dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

#### Allocation:

The allocation is made in accordance with the provisions of EN  $15804. \, Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was performed for certain waste flows according to information provided by the site manager. VOC emissions have been allocated entirely to the production of solvent based paints. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.$ 

# Data quality:

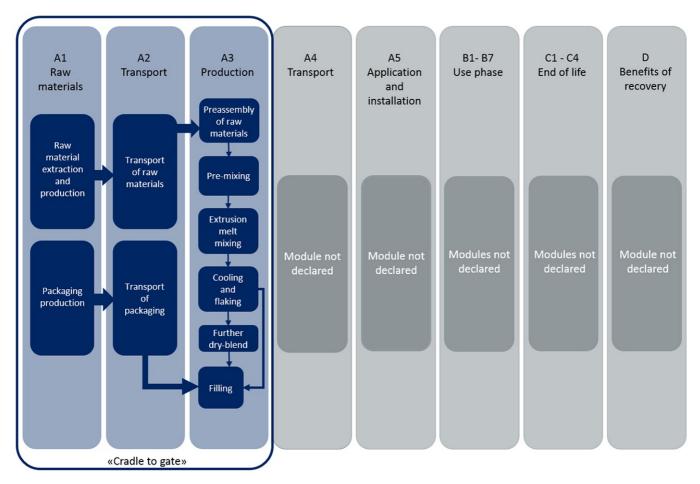

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form

Materials	Source	Data quality	Year
Monomers and Precursors	Ecoivent 3.2 Alloc Rec	Database	2015
Additives	CEPE RM Database v3.0	Database	2016
Binders and Resins	CEPE RM Database v3.0	Database	2016
Pigments and Fillers	CEPE RM Database v3.0	Database	2016
Packaging	Østfoldforskning	Database	2017

## System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle of EN 15804. The analysis is a cradle-to-gate (A1 - A3) study.

## **Additional information:**

 $The \ declared \ product \ contributes \ to \ Green \ Building \ Standard \ credits \ by \ meeting \ the \ following \ specific \ requirements:$

# **Additional requirements**

#### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Electricity, United Arab Emirates (kWh)	ecoinvent 3.3 Alloc Rec	1113,82	g CO2-ekv/kWh

#### **Dangerous substances**

The product contains no substances given by the REACH Candidate list.

#### **Indoor environment**

The declared product do not emit volatile organic substances (VOC) after application.
