

Press release - 01.12.2022

LG Electronics publish Environmental Product Declarations.

The first EPD from LG Electronics for a high-end refrigerator is developed and published.

A strategic cooperation between IGSC - Institute of Global Sustainability Certification from South Korea and EPD-Norway has resulted in this published EPD.

The image shows a document titled "Environmental Product Declaration" for an "Objet Collection refrigerator (MF-B6**, F62****B, M62*****2(S))". The document is issued by LG Electronics and is certified by EPD-Norway. It includes technical details such as the declared unit (1 domestic refrigerator) and the product category (EPD04y007 - PCR for Electronic and Electrical Products and Systems). The document also features the LG Electronics logo and the EPD-Norway logo.

IGSC - Institute of Global Sustainability Certification

IGSC provides International and professional certification services with the cooperation of various certification institutions worldwide. Through the certification services, IGSC aims to help companies to enhance their global competitiveness and sustainable growths, based on IGSC vision. **“Sustainable world with Sustainability certification,”**

EPD-Norway

EPD Norway experience great interest from both Norwegian and foreign businesses in the technical / electronic segment. The interest comes from manufacturers, advisors/consultants, purchasers, and professional and private users

All businesses are facing an increasing need to document their environment impact. The whole value chain is not only asking for but requesting trustworthy and verified information about the environmental performance of products/solution. Not only during the usage phase, but throughout the life cycle. Product Environmental Declaration meets this need.
