Development and verification of EPD:

The declaration has been developed and verified using EPD tool lca.tools ver EPD2020.11, developed by LCA.no AS. The EPD tool is integrated into the company's environmental management system, and has been approved by EPD-Norway

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individual third party verification of each EPD is not required when the EPD tool is i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPDNorway, and iii) the process is reviewed annually. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

Developer of EPD:

Michal Klecz

Reviewer of company-specific input data and EPD:

Bo Quist

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Product description:

Move™ Compact is a continuation of Variers classic sit-stand chair, Move™. What separates this model from its predecessor is its smaller seat and base and lower range seat height, making it even more lightweight and easier to move around. The chair is compatible with height-adjustable and regular desks alike and is optimal for the home office or any other place where you might want variation.

The rubber fixture under the seat allows you to place the chair on the tip of your desk when you're done for the day. Similar to Move™, the Move™ Compact foam seat is available in a variety of upholstery options. The base is made from beech plywood covered with an ash top veneer. The surface is manually sanded and coated with a water-based lacquer available with a natural or black finish. The integrated rubber disk makes Move™ Compact suitable for use on all kinds of floor surfaces.

Product specification

Designed by Per Øie in 1985.

LCA: Calculation rules

Declared unit:

1 kg Move™ Compact

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

System boundary:

A1 (raw materials) to A4 (transport) - products are transported to consumers and assembled by consumers

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

After manufacturing the chairs are transported to our customers, and the customers assembles the chairs themselves. The chair is sold to homes all around the globe and used for generations. Varier currently has no standard refurbishment procedures.
