

# Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

## Balk Slakarmerad Uddevalla Biobetong 2

The Norwegian EPD Foundation

**Owner of the declaration:**

Heidelberg Materials Precast Contiga AB – Concrete

**Product:**

Balk Slakarmerad Uddevalla Biobetong 2

**Declared unit:**

1 tonne

**This declaration is based on Product Category Rules:**

CEN Standard EN 15804:2012+A2:2019 serves as core PCR

NPCR 020:2021 Part B for Concrete and concrete elements

**Program operator:**

The Norwegian EPD Foundation

**Declaration number:**

NEPD-6218-5484-EN

**Registration number:**

NEPD-6218-5484-EN

**Issue date:** 04.03.2024

**Valid to:** 04.03.2029

**EPD software:**

LCAno EPD generator ID: 154809

## General information

### Product

Balk Slakarmerad Uddevalla Biobetong 2

### Program operator:

Post Box 5250 Majorstuen, 0303 Oslo, Norway  
The Norwegian EPD Foundation  
Phone: +47 23 08 80 00  
web: [post@epd-norge.no](mailto:post@epd-norge.no)

### Declaration number:

NEPD-6218-5484-EN

### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR  
NPCR 020:2021 Part B for Concrete and concrete elements

### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

### Declared unit:

1 tonne Balk Slakarmerad Uddevalla Biobetong 2

### Declared unit with option:

A1,A2,A3,A4,A5,C1,C2,C3,C4,D

### Functional unit:

### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

### Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Jane Anderson, Construction LCA Ltd

(no signature required)

### Owner of the declaration:

Heidelberg Materials Precast Contiga AB – Concrete  
Contact person: Håvard Nyman  
Phone: +46 0522 636333  
e-mail: [Havard.Nyman@contiga.se](mailto:Havard.Nyman@contiga.se)

### Manufacturer:

Heidelberg Materials Precast Contiga AB – Concrete  
Kasenabbevägen 11A,  
1662 451 91 Uddevalla, Sverige, Sweden

### Place of production:

Uddevalla, Heidelberg Materials Precast Contiga AB  
, Sweden

### Management system:

Holds a local environmental diploma and is certified for ISO45001, 14001 and 9001

### Organisation no:

556270-5979

**Issue date:** 04.03.2024

**Valid to:** 04.03.2029

### Year of study:

2022

### Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

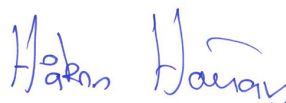

### Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway. NEPDT03

Developer of EPD: Alexander Noré

Reviewer of company-specific input data and EPD: Håvard Nyman

### Approved:

Håkon Hauan  
Managing Director of EPD-Norway

## Product

### Product description:

A precast concrete beam element is a reinforced structural component designed to bear loads and distribute weight across a building's framework. It offers strength, efficiency in construction, and is tailored for seamless integration into various architectural designs, enhancing both the functionality and longevity of structures.

### Product specification

| Materials     | kg      | %     |
|---------------|---------|-------|
| Additives     | 36,53   | 3,65  |
| Aggregate     | 735,39  | 73,54 |
| Cement        | 147,34  | 14,73 |
| Chemical      | 3,31    | 0,33  |
| Metal - Steel | 20,69   | 2,07  |
| Water         | 56,74   | 5,67  |
| Total         | 1000,00 |       |

### Technical data:

The declared unit is 1 ton of a concrete beam in concrete quality C45/55, w/c ratio 0.45 and contains an average reinforcement amount of 18,8kg/ton and an average amount of cast-in materials of 1,88kg/ton.

The declared unit applies to a wide range of dimensions with average amounts of reinforcement and cast-in materials.

Cement is Heidelberg Materials Bascement CEM II 42.5 R. See EPD-HCG-20210157-CAA1-EN

Concrete strength C45/55.

Exposure classes up to XC4-XS2-XD2-XF3.

Life length class up to L100 (100 years).

More technical data and information on load capacity for different dimensions is available at Heidelberg Materials Precast Contiga's concrete factory in Uddevalla.

### Market:

Sweden

### Reference service life, product

Lifetime depends on exposure class. Columns in exposure class XC0 have no limitation in service life.

### Reference service life, building or construction works

More than 50 years.

## LCA: Calculation rules

### Declared unit:

1 tonne Balk Slakarmerad Uddevalla Biobetong 2

### Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

### Data quality:

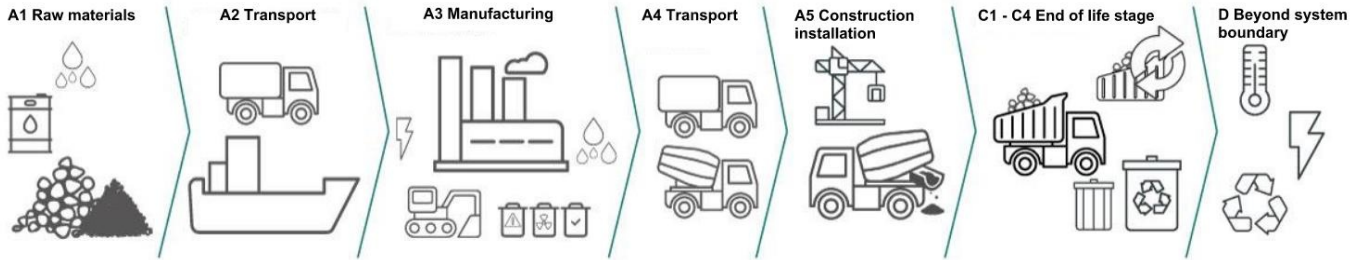

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

| Materials     | Source                   | Data quality | Year |
|---------------|--------------------------|--------------|------|
| Additives     | Supplier                 | EPD          | 2022 |
| Aggregate     | ecoinvent 3.6            | Database     | 2019 |
| Cement        | EPD-HCG-20210157-CAA1-EN | EPD          | 2021 |
| Chemical      | EPD-EFC-20210193-IBG1-EN | EPD          | 2021 |
| Chemical      | EPD-EFC-20210198-IBG1-EN | EPD          | 2021 |
| Metal - Steel | Ecoinvent 3.6            | Database     | 2019 |
| Water         | ecoinvent 3.6            | Database     | 2019 |

**System boundaries (X=included, MND=module not declared, MNR=module not relevant)**

PM = Particulate Matter emissions; IRP = Ionizing radiation – human health; ETP-fw = Eco toxicity – freshwater; HTP-c = Human toxicity – cancer effects; HTP-nc = Human toxicity – non cancer effects; SQP = Potential Soil Quality Index (dimensionless)

"Reading example: 9,0 E-03 = 9,0\*10<sup>-3</sup> = 0,009"

\*INA Indicator Not Assessed

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator
2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

CRU = Components for re-use; MFR = Materials for recycling; MER = Materials for energy recovery; EEE = Exported energy electrical; EET = Exported energy thermal

\*Reading example: 9,0 E-03 =  $9,0 \cdot 10^{-3} = 0,009$

\*INA Indicator Not Assessed

| Biogenic Carbon Content                           |      |                     |
|---|------|---------------------|
| Indicator   | Unit | At the factory gate |
| Biogenic carbon content in product                | kg C | 0,00E+00            |
| Biogenic carbon content in accompanying packaging | kg C | 7,65E-03            |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO<sub>2</sub>

## Additional requirements

### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix           | Data source   | Amount | Unit                      |
|---------------------------|---------------|--------|---------------------------|
| Elektrisitet, Norge (kWh) | ecoinvent 3.6 | 24,33  | g CO <sub>2</sub> -eq/kWh |

### Dangerous substances

The product contains no substances given by the REACH Candidate list.

### Indoor environment

The product has a very small or no impact on the indoor climate.

## Additional Environmental Information

|--|------------------------|----------|----------|----------|----------|----------|----------|----------|----------|----------|-----------|
| Indicator  | Unit                   | A1       | A2       | A3       | A4       | A5       | C1       | C2       | C3       | C4       | D         |
| GWPIOBC  | kg CO <sub>2</sub> -eq | 1,51E+02 | 2,45E+00 | 1,40E+00 | 7,41E+00 | 3,08E+00 | 7,08E+00 | 7,41E+00 | 4,73E-01 | 1,37E+00 | -1,27E+01 |

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
